

land_influence.txt

Land influences are conditions that affect the value of land. An influence may be applied at the parcel level or at the land detail level. The level is specified in the *objecttype* item.

Field delimiter: Tab character

Text qualifier: {none}

<i>Field name</i>	<i>Data type</i>	<i>Description</i>
Id	Number	Primary key.
rp_acct_id	Number	Also known as process number or LRSN.
Influence	Text	Description of this land influence
objecttype	Text	"Parcel" if the influence applies to the entire parcel, "Detail" if the influence applies to a land detail
land_line	Number	Zero if the influence applies to the entire parcel, Otherwise corresponds to land_line in the land_detail record
