

Federal Emergency Management Agency Flood Map KITSAP COUNTY Washington

Legend

FEMA Flood Zone Designation

High Risk - Coastal Areas

Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.

High Risk Area Zones

A

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas, no depths or base flood elevations are shown within these zones.

AE

The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30 Zones.

Designated Urban Growth Areas

Unincorporated Urban Growth Area

Incorporated City

Limited Areas of More Intense Rural Development

TYPE

Type I

Limited Area of More Intense Rural Development - Type I
RCW 36.70A.070(5)(d)(i)
Mixed use areas or small communities intensively developed by 1990, where limited infill development is appropriate.

Type III

Limited Area of More Intense Rural Development - Type III
RCW 36.70A.070(5)(d)(i)
Lots containing isolated non-residential uses of new development of isolated cottage industries and isolated small businesses.

Reservation Boundaries

Tax Parcels

Street Center Lines

State Highway

Major Road

Collector / Arterial

Local Access; Local Road

Watercourses (defined in WAC 222-16-030)

(S) Designated Shoreline of the State

(F) Fish Habitat

(N) Non-fish Habitat

(U) Unknown, unmodeled hydrographic feature.

Lake, Pond, Reservoir, Gravel pit or quarry filled with water

Marsh, wetland, swamp, bog

Bay, estuary, Puget Sound

This map was created from existing map sources, not from field surveys. Determination of fitness for use lies with the user, as does the responsibility for understanding the accuracy and limitations of this map and data.

The information on this map may have been collected from various sources and can change over time without notice.

While great care was taken in making this map, there is no guarantee or warranty of its accuracy as to labeling, placement or location of any geographic features present. This map is intended for informational purposes only and is not a substitute for a field survey.

Kitsap County and its officials and employees assume no responsibility or legal liability for the accuracy, completeness, reliability, or timeliness of any information on this map.

Definitions of FEMA Flood Zone Designations

Flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area.

The Digital Flood Insurance Rate Map (DFIRM) Database depicts flood risk information and supporting data used to develop the risk data. The primary risk classifications used are the 1-percent-annual-chance flood event, the 0.2-percent-annual-chance flood event, and areas of minimal flood risk. The DFIRM Database is derived from Flood Insurance Studies (FISs), previously published Flood Insurance Rate Maps (FIRMs), flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available. The FISs and FIRMs are published by the Federal Emergency Management Agency (FEMA).
