AGENDA ITEM (C)

22-04853 AEW Builders Buffer Reduction Critical Area Variance (CVAR)

Project Description: Due to the small lot size, drainfield separation requirements, lot configuration, required parking spaces and presence of a fish-type creek on the two-adjacent properties, a Critical Area Variance is required to approve residential development on each of the legally platted, non-conforming lots. Adherence to the 150-foot stream buffer would preclude development of the properties. Request is to reduce the buffer to 20 feet at the closest point to the stream, with a reduced building setback of 5 feet, in order to build the two modest-sized two-story single-family residences. Average buffer is approx. 40 feet with 5-foot reduced building setback. Invasive species removal and buffer planting enhancements are proposed as mitigation for buffer impacts, including the addition of bat boxes for additional habitat. A habitat management plan, buffer enhancement and monitoring and maintenance plan has been provided.

Project Location: The north intersection of Madura Drive NE and South Kingston Road NE, Kingston, WA; North Kitsap

Applicant/Owner of Record: Crosby Olsen, Bainbridge Island WA

Project Manager: Christy Christensen, Bremerton WA

Engineer: David Bannon, Poulsbo WA

DCD Project Lead: Steve Heacock at (360) 337- 5777.

PLEASE NOTE: THIS PROJECT IS EXEMPT UNDER KCC 18.04 STATE ENVIRONMENTAL POLICY ACT
