

# 2024 Comprehensive Plan Update

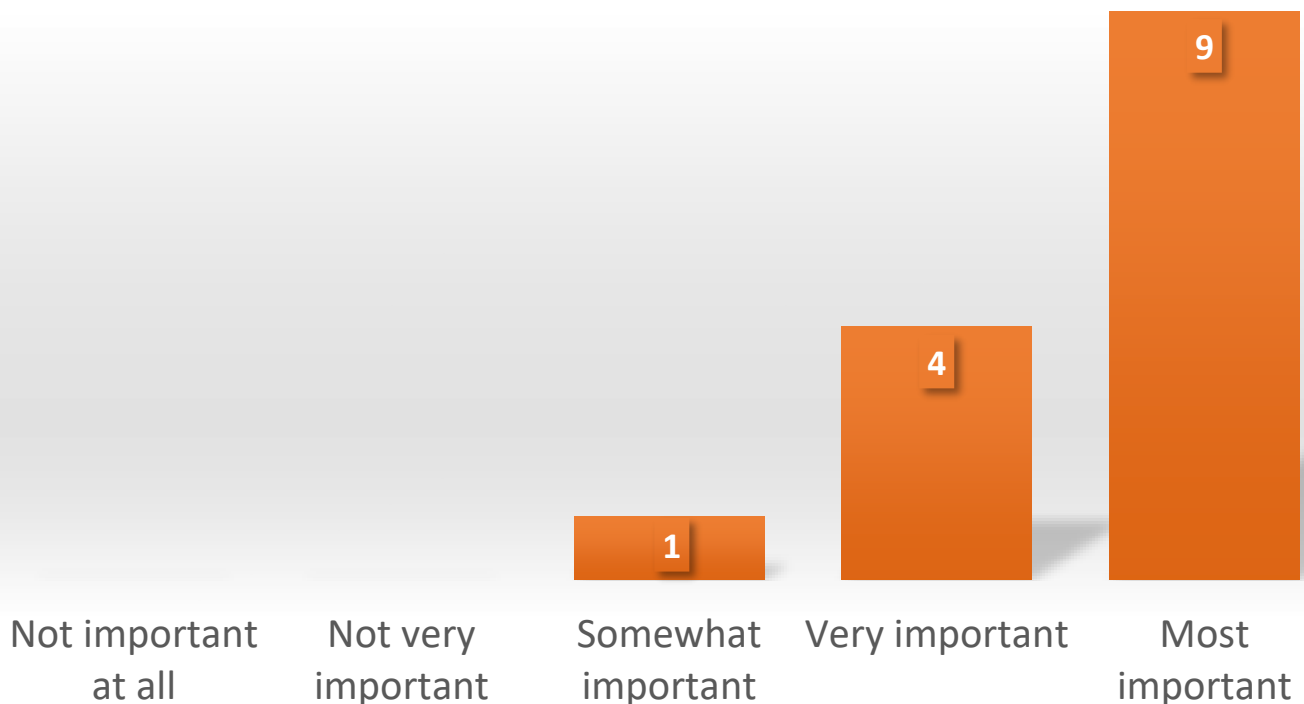

## Poll Results

### October 11, 6 pm Environment and Climate Change Meeting

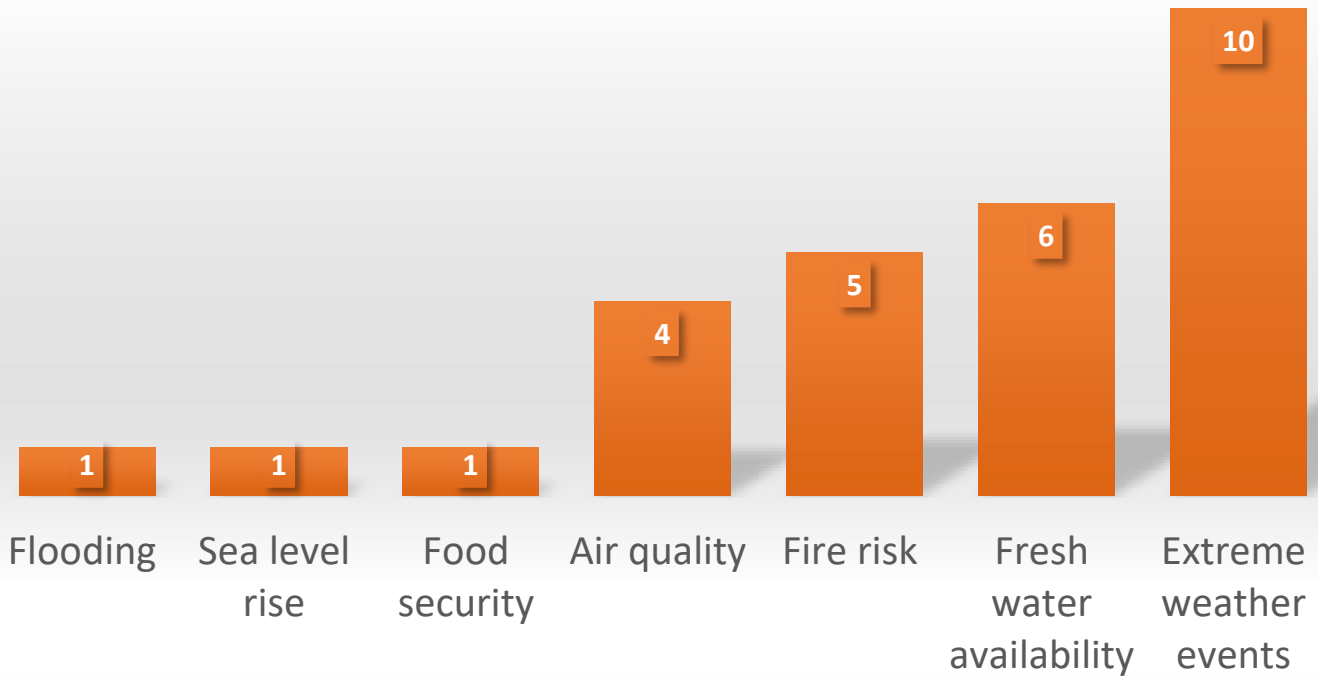

Approximately 20 participants answered a series of questions during our Environment and Climate Change meeting, held via Zoom. Respondents could choose from a limited number of options and no questions were open-ended. Not all participants chose to answer every question. Data values, not percentages, are labeled in results below.

Participants overwhelmingly agreed that **addressing climate change** over the next 20 years at a local level is important, and they identified extreme weather events as the climate change impact they are most concerned about. Forests, fish and wildlife habitat, and water quality were identified as aspects of our natural environment most in need of protection.

#### How important is addressing climate change over the next 20 years at a local level?

## What impacts of climate change are you most concerned about in Kitsap County?

## What aspect of Kitsap County's natural environment are you most concerned about protecting?
